### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art made of record along with the dependent claims do not disclose a method for producing a nozzle for spraying cooling oil for cooling the underside of a piston of a combustion engine, the method comprising:

1. providing a blank of a metal pipe section with an open end to serve as an outlet from the Pipe; inserting a mandrel of elongated and curved cross-section into the open end of the pipe; with the mandrel inserted in the open end, pressing a pipe wall against the mandrel for plastically deforming the open end of the pipe to assume an internal cross-section with a slit opening corresponding in shape to the cross-section of the mandrel; subsequent to the plastic deformation, extracting the mandrel from the open end of the pipe defining a pipe outlet with a curved cross-section outlet slit as the nozzle..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Application No.4,876,990 issued to Hodgkins et al is a similar method.
